

# Your life sciences software team for hire

Flexible, regulatory-ready, and expert-led  
bespoke software – built right the first time.

[FIREFINCH.IO](https://firefinch.io)

## Why getting software right is so hard...

### CAPACITY

Hiring a software team is slow and expensive.

### REGULATORY BURDEN

Compliance requirements slow progress, add cost, and create risk.

### SCIENTIFIC COMPLEXITY

Generic tools and developers lack the depth to meet the level of complexity required.

## That's where Firefinch comes in – solving these challenges with a team built for science, software, and compliance.

- Founded in 2017 by a senior scientist and software team from a leading multinational biotech firm.
- Combining scientific insight with deep software engineering expertise.
- Providing bespoke software solutions with an exclusive focus on the life sciences.
- Trusted by clients ranging from innovative startups to global multinationals.

Custom software for life sciences

Expertise across medical devices, biotech and medtech

Specialists in AI & research data

Built to meet regulatory standards

## Firefinch: Your multidisciplinary team for hire – from science to MVP to market

### EMBEDDED EXPERTISE ON DEMAND

Full software team available without the hiring overhead.

### FLUENT IN SCIENCE AND SOFTWARE

We translate biology into platforms that actually work.

### COMPLIANCE BY DESIGN

Traceability, documentation, and QMS integration built in from the start.

### FASTER TIME TO MARKET

Instant access to senior-level skills, no recruitment delays.

### FIT-FOR-PURPOSE SYSTEMS

Scalable tools designed around your workflows, not forced compromises.

### STRATEGIC PARTNERSHIP

Honest advice, clear roadmaps, and guidance.

We bridge the gap between science and software to accelerate innovation.

# Trusted by life sciences leaders who can't afford mistakes

With Firefinch, you don't just get software — you get a partner who helps you build it right the first time.
